

Titration the EMA appliance

The **EMA** oral appliance from EMA-Sleep, Inc. increases airway space by advancing the mandible using interchangeable elastic straps. EMA elastic straps come in **9 different lengths** (see figure A), and **4 different strengths** (see figure B). The shorter the EMA elastic strap, the farther the mandible is advanced (see figure C). **36 different straps** allow for the most effective repositioning with maximum comfort.

9 different lengths allow for 1 mm advancement of the mandible

Figure A

Each EMA elastic strap comes in 4 different strengths, indicated by color.

Figure B

EMA elastic straps are 100% latex free.

The shorter the EMA elastic strap, the farther the mandible is advanced.

Figure C

EMA buttons are 27 mm apart*

EMA® STRAP LENGTH	DISTANCE BETWEEN EMA BUTTONS	
	27 mm	25 mm
21 mm	6 mm	4 mm
20 mm	7 mm	5 mm
19 mm	8 mm	6 mm
18 mm	9 mm	7 mm
17 mm	10 mm	8 mm
16 mm	11 mm	9 mm
15 mm	12 mm	10 mm
14 mm	13 mm	
13 mm	14 mm	

*EMA-Sleep, Inc. recommends a distance between the buttons of 27 mm in the centric position. If the patient's range of mandibular advancement is limited to 9 mm or fewer, a distance of 25 mm distance is recommended.

SIMPLICITY EXEMPLIFIED

PROVEN SLEEP TECHNOLOGY

Patented, custom design resulting in comfort and effectiveness

Minimal profile and anatomically correct occlusal pad to maximize oral cavity volume

9 different lengths allow for 1 mm advancement of the mandible

- Clinically proven to be effective since 1993
- Improves nighttime breathing by advancing the mandible to maximize airway space
- 36 different strap options allow for effective repositioning with maximum comfort
- Thin, biocompatible material
- FDA Cleared
